

NexusEdge is an online platform for skill development that turns employer-defined hiring requirements into materials teachable within the classroom.

THE PROBLEM

- Skilled workers are in short supply and the marketplace isn't producing enough qualified candidates.
- Employers have difficulty finding candidates with skills necessary for positions in their local community.

THE SOLUTION

- NexusEdge provides an ecosystem of skills-based assessments (Badge Exams) defined by employers for specific positions, creating currency between employers and job candidates.
- Employers can now cultivate a workforce with the necessary skills and keep talent within their local community, and students will have more access to jobs in their local community upon graduation.

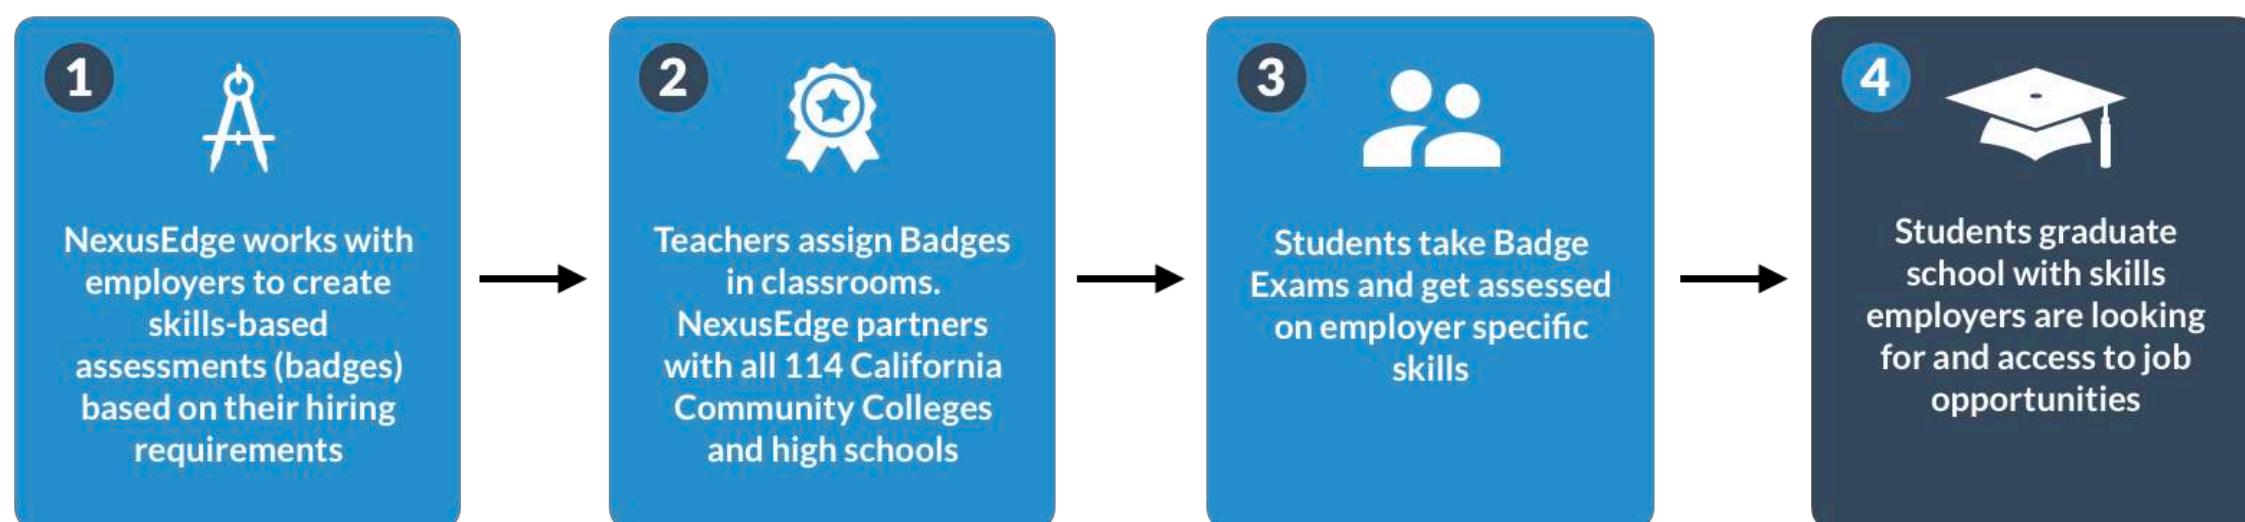

WHAT IS A BADGE

Badge exams are employer generated skills assessments

- 1 Generated in collaboration with employers, creating ultimate credibility
- 2 Turns employer hiring requirements into learning material & exams that are integrated into classrooms
